Todos los materiales son antioxidantes.

Los recubrimientos que se realizan a nuestras piezas son electrolíticos, cumpliendo con la norma UNE 27-551-75 y siguiendo con el siguiente proceso de aplicación: baño de cobre alcalino 0,25, baño de cobre ácido, baño de níquel brillante 0,27, baño de níquel semibrillante y, por último, baño de cromo 0,22; por lo que nuestras piezas alcanzan un espesor medio mínimo de 40 micras.

Todos nuestros fabricados cumplen el ensayo de corrosión en Cámara de Niebla Salina Neutra de más de 200 horas, según la norma UNE 112-017-92.

All products are stainless.

We use electrolytic coating to our products during the production process following the quality standard UNE 37-551-75; as it follows: alkaline copper plating plus acid copper plating plus bright nickel plating plus semi-gloss nickel plating and finally a chrome plating, following all those steps we reach a minimum average thickness of 40 microns.

All our products fulfill the corrosion test for more than 200 hours, according to the quality standard UNE 112-017-92.
